

# TRAMPOLINE PARKS

A new trampoline park opens nearly every day somewhere around the world. They're exciting, extremely profitable and appeal to a multigenerational market. These entirely custom-made projects can be fully adapted to different target groups by including a mix of different attractions. Akrobat converts empty halls into exciting and profitable family entertainment destinations.

EUROPEAN  
MANUFACTURER WITH  
VAST EXPERIENCE

**With experience since 2003**, AKROBAT is one of the leading European manufacturers of trampolines and trampoline parks, focused on bringing real value to our customers.

**Our strong global track** record of projects tailored to individual customer preferences is the result of extensive knowledge and experience with materials and functionality of trampolines and other park components. We deliver to more than 45 countries across 4 continents to individual investors and known franchises.

**In-house production** ensures our customers a faster project realisation and spare parts delivery, which at the same time minimises stock requirements and reduces the maintenance cost for the investor.

Member of:

## TURN - KEY SERVICE

Our service includes turn-key delivery of the trampoline park including design, manufacturing, installation and maintenance.

## TOP-QUALITY MATERIALS

Materials used are 100% top-quality material from European and US manufacturers, non-toxic, very durable and in line with REACH standard. We continuously test all the materials with independent institutions and with our own engineering team.

## OPTIMAL SAFETY PERFORMANCE

We guarantee the design and manufacturing of the trampoline park according to ASTM F2970, PAS 5000, EN 13219, EN 913 and EN 1176 standards..

## ALL DETAILS INCLUDED

Our offer always includes every little detail of trampoline park that the customer expects, meaning all major elements of the park, and of course also platforms, soft paddings in all areas around the trampolines, safety nets, padding for pillars, wall protection, safety encloses, and wall and column protection down to the last detail.

## 100% QUALITY CONTROL

All Akrobat parks are 100% pre-installed in the factory to ensure quicker installation on site, perfect component fitting and superior product quality.

## AFTER SALES ACTIVITIES

Additionally, we offer reconstruction of existing set-ups, by replacing the worn and torn equipment with Akrobat top quality European-made parts.

## ONE-STOP SHOP

IN-HOUSE PRODUCTION

CONFORMITY TO STANDARDS

ON-SITE INSTALLATION

### BESPOKE DESIGN AND ENGINEERING

Our tailored layouts are individually suited to each customer's preferences and let you mix and match standard, angular and high-performance trampoline fields as well as our patented hexagonal trampoline fields with a larger jumping capacity. Akrobat trampoline parks are perfectly suited to specific building characteristics and conform to the ASTM F2970 or PAS 5000:2017, EN 13219, EN 913 and other relevant standards. By mixing in different exciting attractions we create venues that appeal to a variety of user groups.

### IN-HOUSE PRODUCTION

We produce all components in-house to guarantee consistent quality of our products, unsurpassed customer service, shorter delivery times for complete parks and spare parts, with an optimised price structure for the client.

### ON-SITE INSTALLATION

Our expert team of installers are an integral part behind delivering a product which not only appears top notch, but can withstand masses of people over a longer period. By taking deadlines seriously we ensure earlier opening dates of the park.

### GLOBAL SUPPORT AND MAINTENANCE

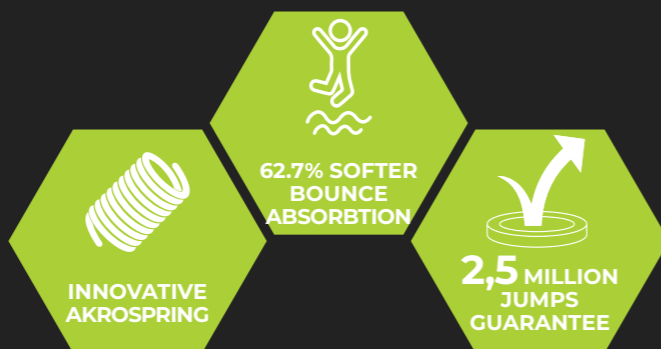

Thanks to our central location in Europe, we also provide our customers with a rapid supply of replacement parts. We offer a wide selection of materials and colours and production and delivery of spare parts that are made in our production facilities. By offering customised maintenance packages, we bring the park operators peace of mind and keep the parks looking fresh for years to come.

### CONSULTING

Every project is unique and special to us. An experienced team of experts will advise you about the special requirements of location and the facilities, as well as design and space utilisation and cost effectiveness of the selected modules.

## SAFETY PERFORMANCE & TOP-QUALITY MATERIALS

## WHAT MAKES OUR TRAMPOLINE PARKS SAFER?

### MATERIALS

We use only thoroughly tested, certified, non-toxic and weather-resistant materials, compliant to Reach standard, sourced from European and US manufacturers, to ensure long years of operation supported by industry-leading warranties.

### PVC

The anti-slip and tear-resistant 620g/m<sup>2</sup> material used in all our padding is coated as opposed to laminated to prevent chipping and tearing during use, and is available in an extensive palette of exciting colours.

### DOUBLE-LAYER JUMPING MATS

Our unique redundancy system ensures that the mat stays in function in the event of small tears in the upper layer of the jumping mat.

### PADDING

The high-quality cross-linked 6-centimetre foam used in trampoline safety pads, floor and other types of padding, will stay in shape over a long period of intensive use.

### AKROSPRINGS

Due to their special design and pre-tensioning they substantially reduce the G-forces affecting the spine and joints during jumping. This makes jumping safer on the body while guaranteeing a notable superb bounce performance. All springs are made in house and are thoroughly tested to withstand at least 2.5 million jumps.

### SPRING PROTECTION

Safety straps prevent foot access to the springs and are produced to stay in place.

### STEEL STRUCTURE

The welded pre-galvanised steel structure has resistance to much higher forces and is additionally reinforced to provide maximum mechanical strength. The sturdy design leaves flexibility to use very little drilling into the floor, when there are limitations, which can also be a major time saver.

### SAFETY NETS

Padded and produced with metal bars at side, top and bottom for stability, durability and nice tension. We can provide printed safety nets displaying graphics for the branding of the park.

# SPECIALITIES

PLAYFUL  
DESIGNS

MIX & MATCH  
MODULES

## WHAT MAKES OUR TRAMPOLINE PARKS UNIQUE?

### INNOVATIONS

Our parks are equipped with the latest technology for the management and control of trampoline parks. The basis of this solution is the sensors built into each trampoline. The solution enables controlling the occupancy of individual elements in the trampoline park via an application on a computer or phone in real-time. It allows you to see the current temperature of the outdoor trampoline park, control and manage the lighting directly from your phone, and much more.

### DIGITALIZATION

Trampoline parks are always in need of new attractions and challenges for visitors, that is why we are constantly upgrading our parks with new games and attractions, introducing technologies that surprise park owners and visitors too.

### MIX & MATCH SYSTEM

Our modular approach allows mix & match of different attractions and uncomplicated future replacement of entire segments with trendier ones.

### PLAYFUL DESIGNS

With a wide selection of materials, colours and modules, we build truly unique park designs. By printing graphics on different surfaces, we create spaces that bring unsurpassed user experience.

### SPACE UTILISATION

In designing the park we keep our focus on every detail and we don't leave any spot of the park unused;

- **Zip lining and adventure in the sky**
- **A rope course** is perfect for high halls where the extra space can be utilised and used for an additional adventure course.

### TOUCH AND FEEL

Akrobat trampoline parks feel different from the moment you enter. The elements are perfectly fitted together and appeal to the eye due to perfected workmanship. The materials feel durable and well executed.

## SMART TRAMPOLINE PARKS

We understand that running a trampoline park is a complex business, which, in addition to all the pleasures, also brings daily challenges. Most importantly, the trampoline park must be safe for the visitors and, of course, profitable for the owner.

What you could do that directly from your smartphone or other devices?

The basis of a platform is a smart sensor that we place under each trampoline and connect all of them into one intelligent system available at your fingerprints, anytime and anywhere you want.

Sensors perform various measurements and offer you up to date and accurate statistics on every trampoline module in your park at all times.

That way, you gain total control over park occupancy, occupancy of each module, use of games, room temperature or lights. Consequently, you can rank parks modules by interest, measure the profitability of individual elements and act accordingly.

## 5 ADVANTAGES OF SMART PARK SOLUTION

### PARK CONTROL

That way, you gain total control over park:

- PARK OCCUPANCY
- OCCUPANCY OF INDIVIDUAL MODULES
- ROOM TEMPERATURE CONTROL
- LIGHT CONTROL
- USE OF GAMES CONTROL

### MAINTENANCE & WARRANTIES

- **SYSTEM WARNINGS**  
Which trampolines need to be inspected more regularly because they are out of warranty or are likely to wear out.
- **PRE-ORDERS OF PARTS**  
Which parts will first wear out to have them in stock for a quick replacement.
- **AKROBAT PREVENTIVE MAINTENANCE SERVICE**
  - Timely replacements
  - No operational delays of the park

### QUICK REACTION TIME

- **PLANNING TO REPLACE PARTS OR PARK MODULES**  
Due to wear and tear or overloads.
- **QUICK REACTION IN CASE OF GAME ERRORS**  
An online connection enables immediate detection and troubleshooting.

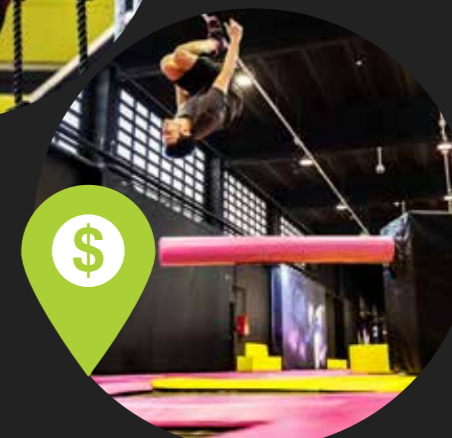

### STATISTICS & PLANNING

- COMPARISONS BETWEEN YOUR PARKS
- RANKING OF MODULES BY INTEREST
- PROFITABILITY OF INDIVIDUAL ELEMENTS
- EASIER INVESTMENT PLANNING
- USE OF GAMES CONTROL

### GREATER PROFITABILITY

- **SYSTEM WARNINGS**  
Which trampolines need to be inspected more regularly because they are out of warranty or are likely to wear out.
- **PRE-ORDERS OF PARTS**  
Which parts will first wear out to have them in stock for a quick replacement.
- **AKROBAT PREVENTIVE MAINTENANCE SERVICE**
  - Timely replacements
  - No operational delays of the park

**MEET THE NEW GENERATION OF TRAMPOLINE PARKS!**

HEXIA is a perfect combination of slick design and functionality, due to its unique hexagonal shape.

HEXIA provides 15% more jumping capacity compared to rectangular systems and increased safety, with that a better return on investment and exclusive user experience.

*DISCOVER HEXIA'S LEADING ADVANTAGES:*

## OUTDOOR TRAMPOLINE PARKS

**TRAMPOLINE PARKS OFFER PLENTY  
OF FUN AT ALL TIMES OF THE YEAR.**

At Akrobat, we also set them up on outdoor areas with all the attractions that you can find in indoor parks.

Why jump indoors when you can enjoy the fresh air outside!

*JUMP & HAVE FUN!*

## TODDLER PLAYGROUNDS

**TODDLER AREA IS A UNIQUE  
PLAYGROUND FOR CHILDREN  
AGED FROM 1 TO 5 YEARS.**

It can be set up as an independent unit or as a part of a trampoline park, which is separated from the rest of the trampoline park as a safe environment fully adapted to development phase of toddlers.

Suitable for indoor or outdoor installation.

# ATTRACTIONS

## FREE JUMP AREA

is vital to pump up the user capacity. Attractiveness is achieved through combining horizontal and diagonal trampolines with runways, jump platforms and different obstacles.

## TRAPEZE

initiates visitors to swing from an elevated platform and perform courageous new acrobatic tricks into a soft cushion of foam. Usually, we see a trapeze in the circus, but it can be placed in a trampoline park too, as a self-standing structure or can be incorporated in some other module of the park. Both adults and teenagers will enjoy the trapeze! Users jump off a block or tower and swing through the air like a real circus artist. You can swing on the trapeze and land in the airbag or foam pit with a simple jump. More experienced users can swing on the trapeze and make a spectacular jump at the highest point.

## TRAMPOLINE PARKOUR

is an area with different obstacles positioned at different height levels dedicated to free style jumping and for training agility and coordination skills.

## INCLINE TRAMPOLINES

inclined fields are installed vertically on the horizontal fields at an oblique angle. They allow users to jump off the sides of the arena.

## HIGH-PERFORMANCE TRAMPOLINES

with increased bounce are intended for advanced users with great motor skills to practise higher jumps and execute more complex tricks or just have fun wall-walking after bouncing off their backs from the jumping mat.

## HEXIA TRAMPOLINES

offer a perfect combination of slick design and functionality, due to their unique hexagonal shape. Hexia provides 15% more jumping capacity over the same total area available! The patented Akrobat X-springs system also requires narrower safety pads, making the trampolines safer to use, while incredibly resilient technical design ensures a prolonged service life.

## RUNWAY

is long trampoline track where you can learn to master series of jumps and somersaults.

## TODDLER AREA

is specially dedicated to children aged 1 to 5, and is separated from the rest of the park to create a safer environment fully adapted to the development phase of toddlers. Springs in smaller size trampolines are replaced by elastics to reduce impact on the spine and joints. All surfaces are padded with soft foam to ensure safe and happy crawling.

## PARKOUR TARGETS

the more skilled visitors that wish to master their skills overcoming various obstacles, jumping over wooden boxes and swinging on metal bars.

## AUGMENTED WALL

is an interactive game which brings climbing to a brand-new level. A laser projection of different games onto the climbing wall challenges the user to change the direction of his movement or to play different climbing games against other users.

## CLIMBING WALL

These indoor walls are a great place to get started with rock climbing as they provide a controlled environment, free from wind and rain, where you can build up your skills.

## INTERACTIVE WALL

This attractive game engages two players or teams to compete against each other by pushing buttons on the wall that illuminate in random order. Results are displayed on a score board.

## NINJA WARRIOR COURSE

encourages users to jump, climb, hang and swing on an unlimited number of different obstacles and put to the test their agility of hands and legs, as well as their speed, balance and strength. A Ninja Timer can be installed to challenge youngsters to compete against each other, or against the clock.

## DODGEBALL

is a game played by two opposing teams who try to throw balls at each other. The play area is divided into zones, with balls placed in the centre.

## AIRBAG

Another of users' favourite park activities is jumping from trampolines or platforms onto the big airbag. This is where you can test your skills at new tricks before trying them on trampolines.

## HALFPIPE RAMP

Perfect choice for adrenaline enthusiasts. A halfpipe ramp is a great option for accessing the jumping platform from where they perform acrobatics directly into the airbag.

## SLACK LINE

is the ultimate tightrope walking test of balance. Beginners like to slide their feet to get from one end to the other, while the more experienced slackliners like to throw some tricks in there too! The best part is, if you lose your balance you will fall onto a great big, soft cushion so you're ready to get back up and try it again!

## FOAM PIT

is all about big air and soft landings. The ideal area to practise your most daring stunts safely into a pool of huge foam cubes. So soft, it will feel like a cloud.

## ROTATING BEAM

is a game for 8 players that challenges the players to stay in the games as long as possible while giant spinning arms knocks them down. The game promotes the stamina and agility of the players.

## NINJA HEXIA

encourages users to climb up to the second floor through different obstacles and puts their agility, stamina, balance and speed to test.

## NINJA TODDLER

is a module developed for our young Ninjas where they develop their motor skills with climbing, jumping, crawling and many other activities.

## DODGEBALL ATTACK

is a game where the players in the dodgeball court need to hit the targets with the ball. It takes a lot of precision to hit the target while jumping which makes the game even more fun.

### ZIPLINE

is a new adrenaline activity in our parks where users glide between two points on a steel rope. Participants glide through the whole park and can see the park and all the other users from above.

### ROPE COURSE

is a challenging activity which consists of various elements above ground. This activity promotes the agility and dexterity of users.

### DIGITAL GAMES

A range of interactive trampoline games which is meant for all players regardless of their skill levels, age or height. While playing these games users get an immersive digital experience, having fun and exercising at the same time. Digital games that we integrate into the parks are original, cloud-based solutions, regularly upgraded, with 24/7 customer support and integrated reporting system. The range of games is expanding every day. Upgrade your Trampoline park attractions to the next level.

### CARDIO TOWER

Challenge your friend with jumping and playing on cardio tower with a digital game. Touch flashing buttons as fast as you can and try not to miss any.

### AIRTRACK MULTI COURT

is a versatile activity center with a high-performance multi-sport court. These versatile inflatable floors are designed with the ability to fit your space and athletic needs. Sport Court's durable and premium multi-sport game courts will provide your facility with the flexibility to provide a basketball, volleyball, football, dodgeball and other games! Custom designed inflatable multi-sport court provides a safe and soft bouncy surface for every roll, bounce, pass and rebound in your game.

### BOUNCE PARKOUR

Bounce parkour combines core elements of Parkour and Free running into an exciting and challenging course. The aim is to balance fun, and skills progression and development. The program develops and harnesses balance, strength, coordination and agility through the lens of freestyle sport. The aim is to overcome obstacles on different levels using only the natural movements of the human body.

### DODGEBALL CAGE

Dodgeball cage takes the classic game to a whole new level. Not only does the dodgeball fly, but so will you and your teammates as you jump and swerve to avoid the ball or to tag players on the other team. The main advantage of dodgeball cage is, that it is transparent all around and that it fits also to the main court. Due to the installed protective net, it can be placed centrally in the park and there is no need to place it in the corner of the park as DODGE BALL usually is.

### 3D MAZE

Designated cube is designed to overcome vertical and horizontal challenges. It includes walkable and hanging elements. The game offers challenge, excitement, competition with timer included and entertainment for all users.

### HONEYCOMB MAZE

Designated hexagonal wooden element is designed to overcome horizontal challenges. It includes walkable elements and slides that are suitable for smaller kids. The game offers challenge, excitement, competition and entertainment. We usually place it in the toddler area because it is intended for children.

### ROPE COURSE

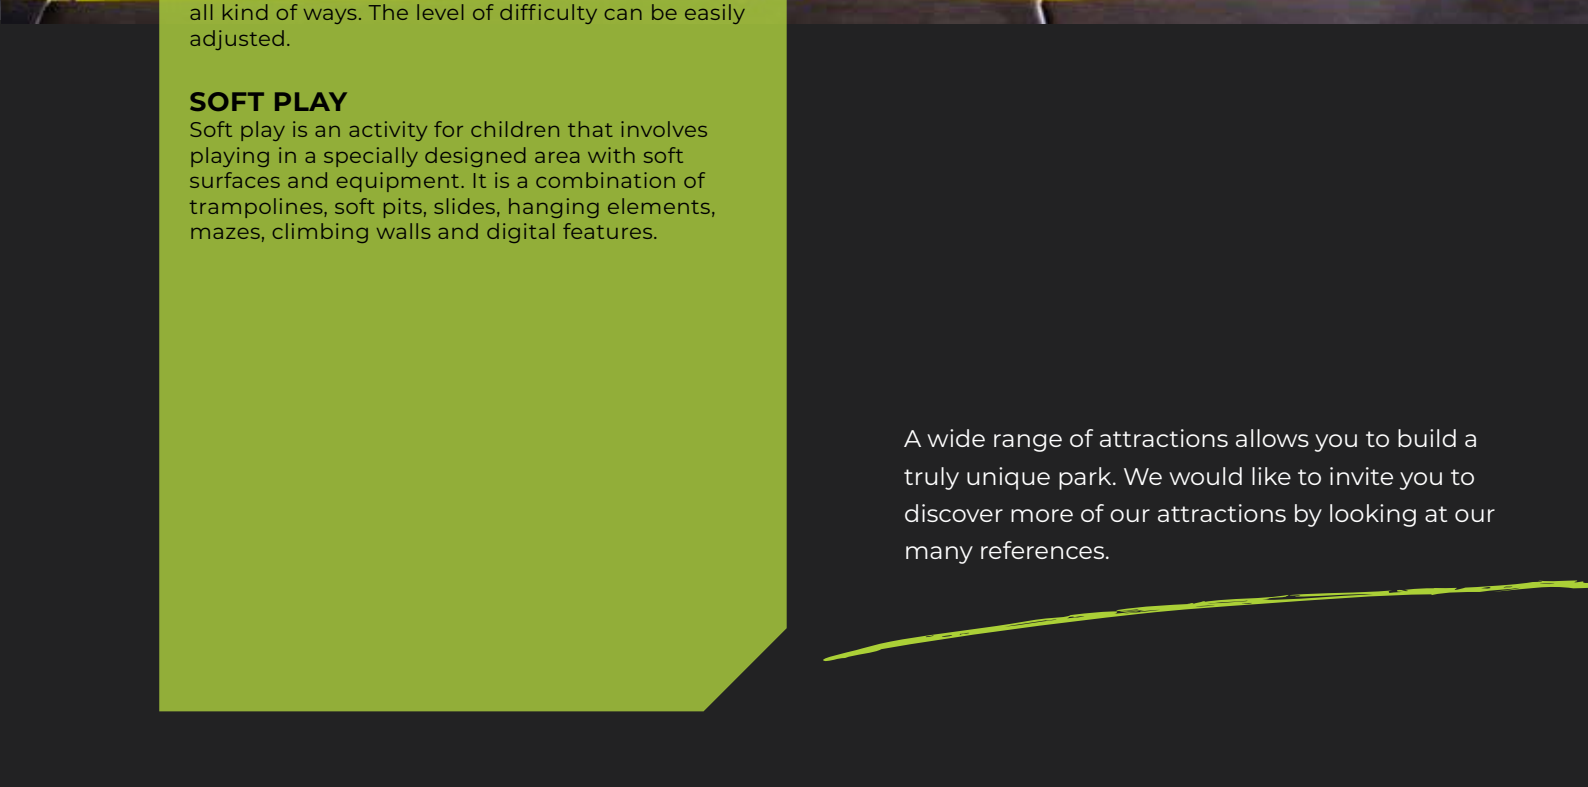

A ropes course is a challenging personal development and team building activity which consists of high and/or low elements. Elements are constructed on hanging structure and require a belay for safety.

### MULTI STORY HEXAGONAL NINJA TOWER

Multistorey hexagonal tower designed for young kids. This new element offers exciting agility challenges on different levels. To overcome obstacles, users perform many different moves that are a combination of jumping, climbing, hanging, swinging and others. At the end of the course users slide to the soft pit full of small balls. The wide range of obstacles challenges visitors in all kind of ways. The level of difficulty can be easily adjusted.

### SOFT PLAY

Soft play is an activity for children that involves playing in a specially designed area with soft surfaces and equipment. It is a combination of trampolines, soft pits, slides, hanging elements, mazes, climbing walls and digital features.

A wide range of attractions allows you to build a truly unique park. We would like to invite you to discover more of our attractions by looking at our many references.

# ABENTEUERLAND

Bispingen, Germany / 1.460 m<sup>2</sup>

Jump in the most modern trampoline park in Germany, with very wide range of attractions and modules. Visitors can climb new heights on big climbing wall or on the high rope course, test skills on the ninja course or play in toddler area.

DIGITAL GAME

ZIP LINE

HIKING LEADER

CLIMBING WALL

# ALTITUDE LAWRENCEVILLE

United States / 2.300 m<sup>2</sup>

One of the most modern parks in the US is made for one of the largest trampoline park franchises Altitude. The park is equipped with many digital modules, and with all attractions, that a modern trampoline park should have: a huge main court, gymnastic tumble track, dodge ball, rock wall, performance trampolines, trapeze swing, trampoline basketball, warp wall, stunt bag, zip line and many more.

DODGE BALL COURT

FREE JUMP AREA

BATTLE BEAM & SAILOR LADDER

MULTI SPORT COURT ON AIR TRACK

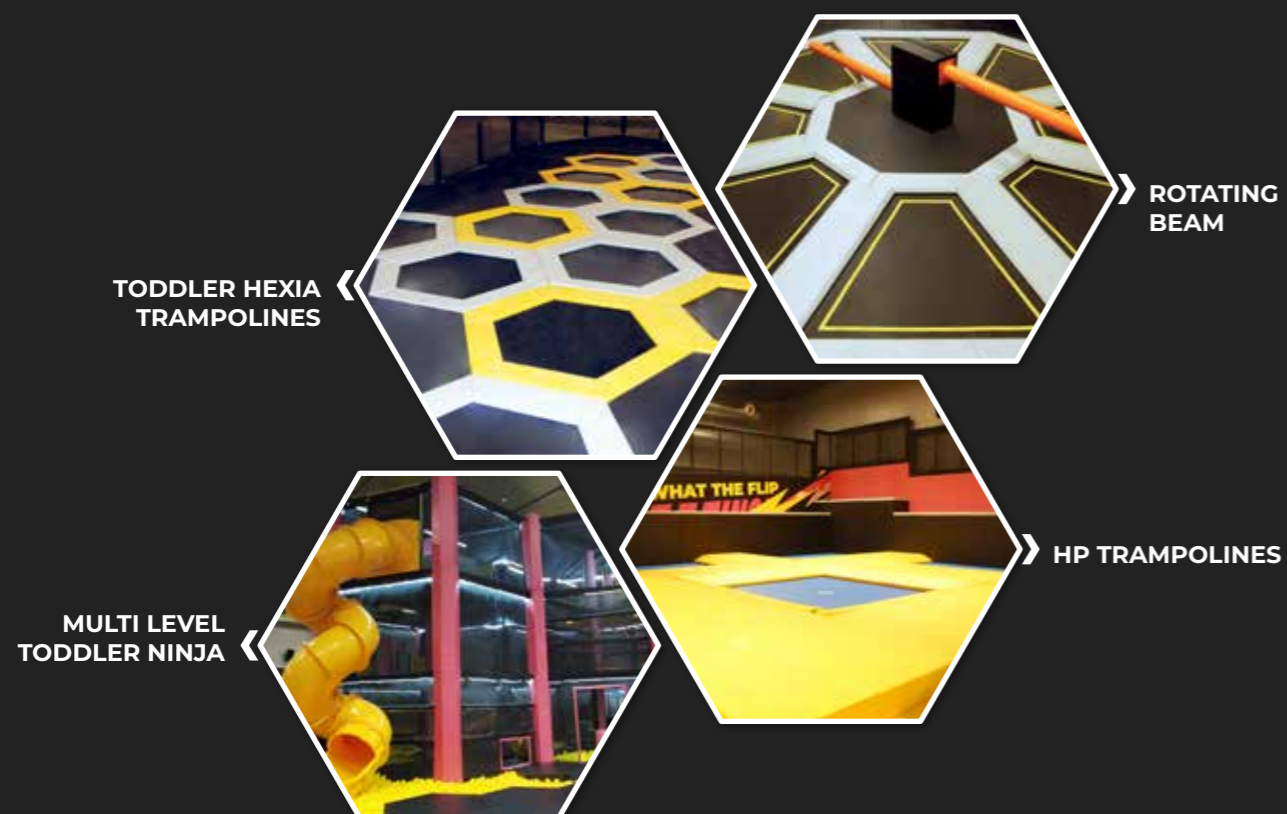

# AMAZINGA

Zagreb, Croatia / 1.890 m<sup>2</sup>

The first trampoline park in Croatia, where we are launching brand new attractions and innovative modules like; football pitch, rotating beam with trampolines and multi story toddler ninja area.

# BIVILLAGE

Fažana, Croatia / 895 m<sup>2</sup>

The first outdoor trampoline park in Croatia inside BiVillage campsite. The park includes all the modules that indoor trampoline parks have, such as ninja court, rotating beam, main court and incline trampolines, dodge ball court and many other exciting attractions.

# CRAZY JUMP

Szeged, Hungary / 650 m<sup>2</sup>

This trampoline park is located in a very well visited shopping center in the town of Szeged. Despite the fact that the park is one of the smallest in terms of its square footage, it contains almost all the main attractions we can expect in modern trampoline parks. In addition to digital there is also an attractive rotating beam for 8 people, a two-layer ninja court, a climbing wall, an airbag with games, a basketball court, a dodge ball, and a main court.

# CYBERJUMP

Budapest, Hungary / 1.400 m<sup>2</sup>

Largest park in Hungary located in downtown of Budapest. With its slick cyber-theme and a choice of challenging elements it attracts youngsters from a somewhat older age group than usual for trampoline parks.

# CYBER JUMP

Bucharest, Romania / 1.160 m<sup>2</sup>

Cyber Jump is a very attractive trampoline park in Bucharest, with a total area of 2.500 square meters. Park includes such popular modules as the High-Performance area, Ninja Warrior Track, Battle Beam Track, Slackline, Airbag, Interactive wall, Climbing wall, and more. And for the rising-hair jumping experience, park offers 14 types of exciting games.

# CYBER JUMP

Bratislava, Slovakia / 1.500 m<sup>2</sup>

The park meets requirements of the toughest international safety standards and it's quality was also approved by TÜV Austria. 13 different types of games that are located in area of 1.500 square meters offer an unforgettable experience for all age groups. High-performance arena is especially attractive and it guarantees an exciting time also for experienced jumpers.

# CYBER JUMP

Vienna, Austria / 5.000 m<sup>2</sup>

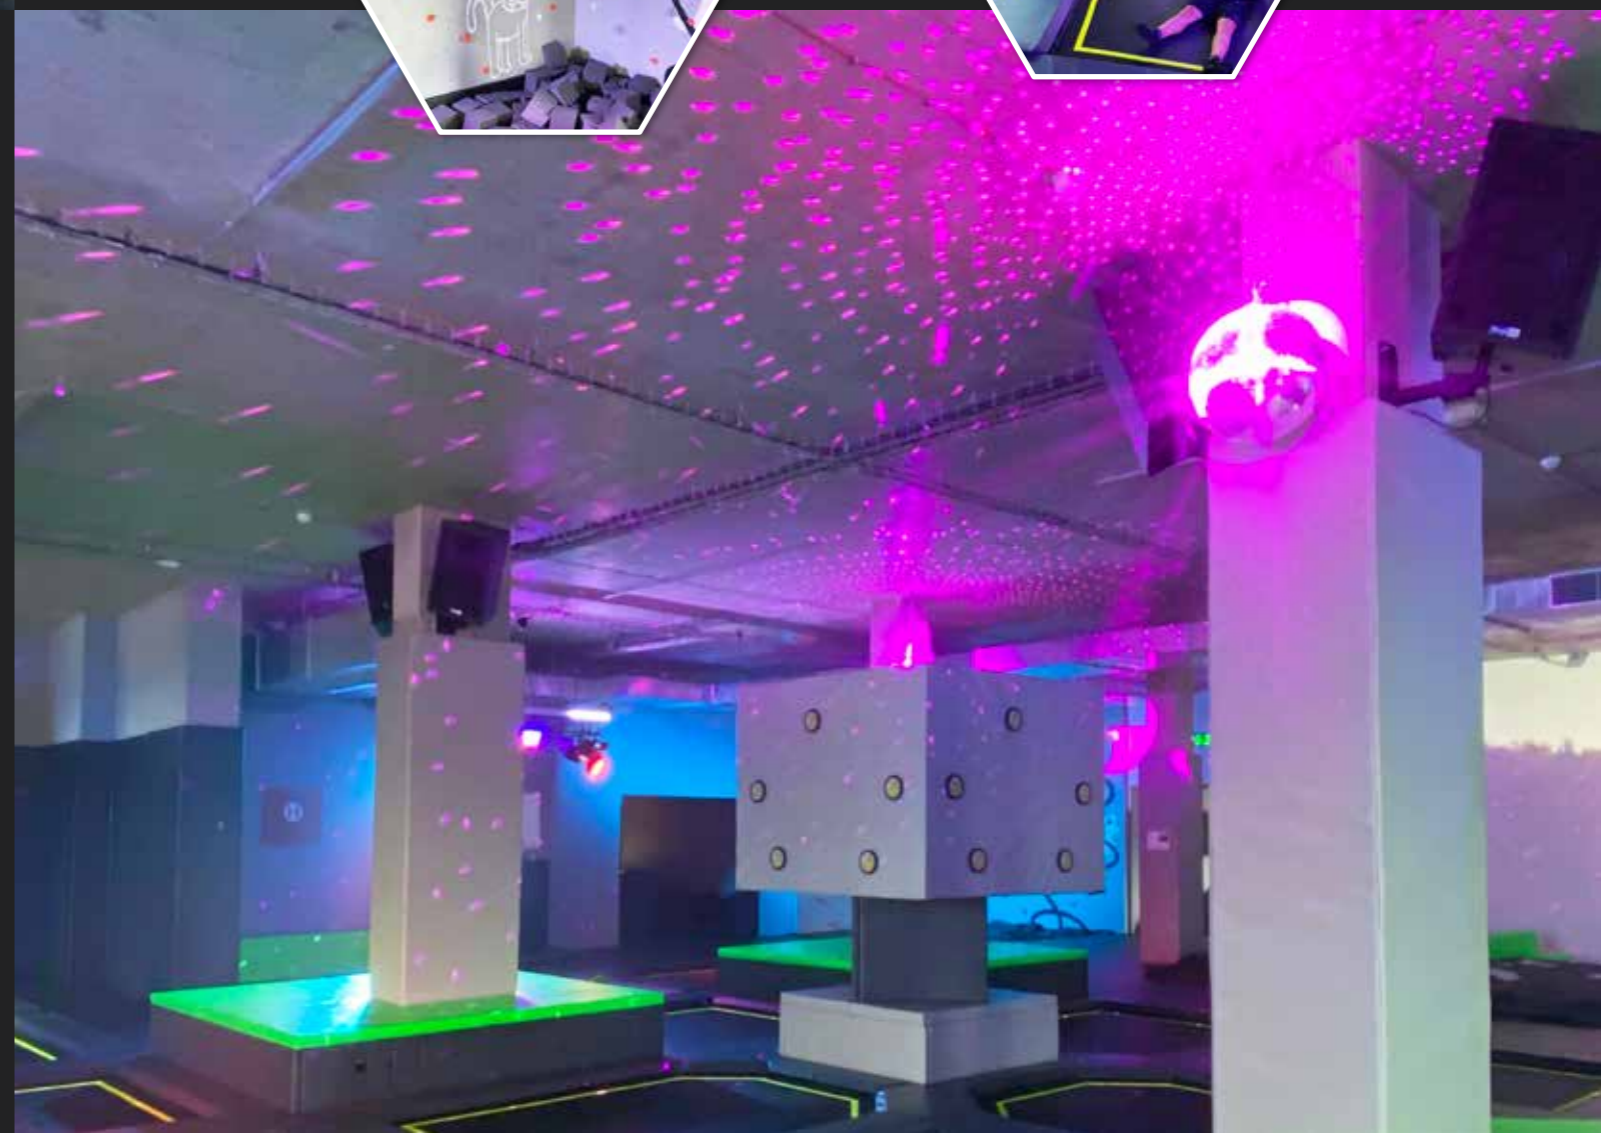

Located on 5.000 m<sup>2</sup> the Cyberjump Vienna 22 Trampoline Park welcomes visitors looking for an active entertainment. Over 30 different games offer an unforgettable experience for all age groups. The park is filled with the latest gaming innovations on the market and is unique in Austria. The trampoline area is fully equipped with electronic gamifications giving you a completely new gaming and jumping experience.

# FREEEX

Říčany, Czech Republic / 700 m<sup>2</sup>

Is the first unique trampoline park with a special effect that will impress every visitor!! Acrobatics and jumping on trampolines are complemented by lighting effects, lasers, music, and interactive games on projection screens with motion sensors. The park offers dozens of trampolines, games, and attractions designed with the latest technology. The design includes neon PVC and stripes on the membrane that glow in the dark and under UV light (blacklight).

# FLYZONE

Ras Al Khaimah, United Arab Emirates / 1.460 m<sup>2</sup>

FlyZone is a trampoline park of 1.460 m<sup>2</sup> for an exciting time for family and friends to enjoy together! FlyZone park includes the most popular modules, such as freestyle area, foam pit, ninja warrior, dodgeball, climbing wall, HP interactive wall, waterfall, air bag. A special toddler zone offers fun games for children under 5 years old and their parents.

## ACCESSORIES

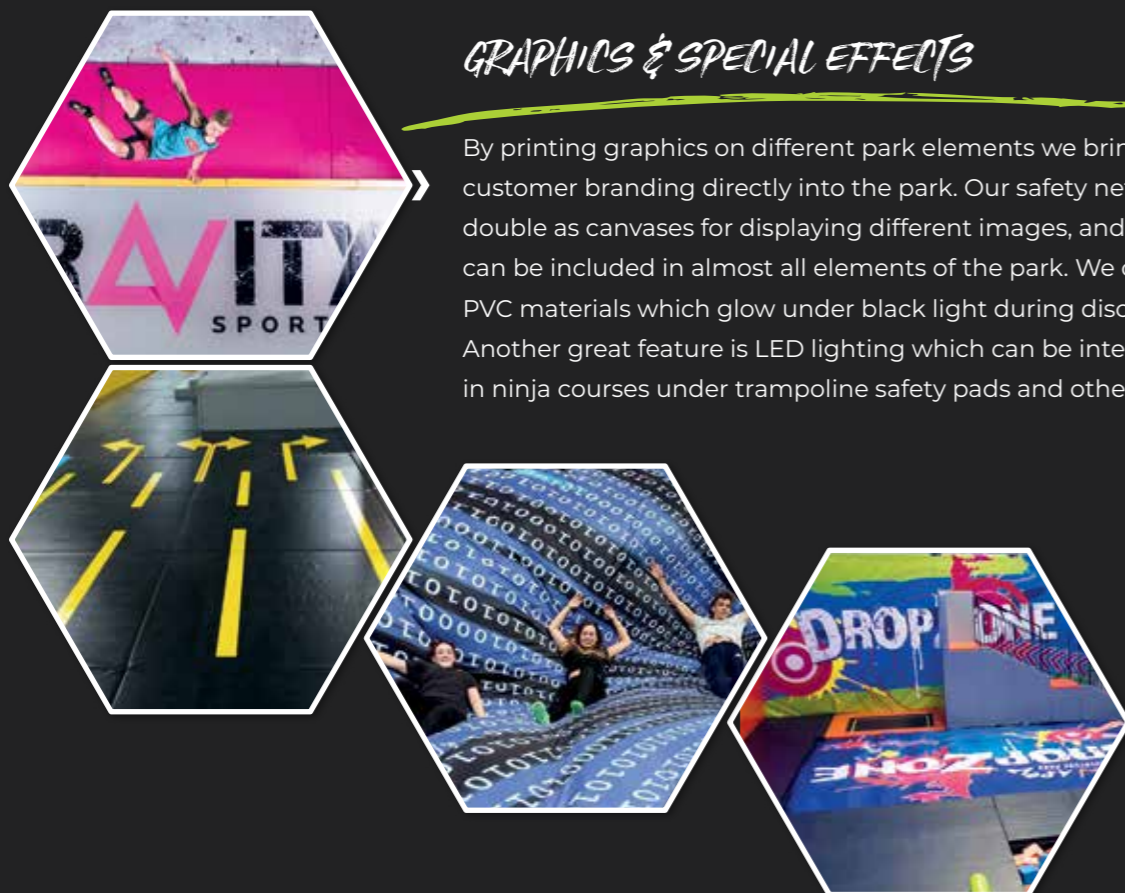

### BALLS, BATTLE STICKS, FOAM CUBES, TRAMPOLINE SOCKS

Due to intensive use, some items need to be replaced on a regular basis. We offer a quick delivery of a wide range of handy gadgets, including foam cubes in different colours, branded socks, different types of balls, safety pads, etc.

### GRAPHICS & SPECIAL EFFECTS

By printing graphics on different park elements we bring customer branding directly into the park. Our safety nets double as canvases for displaying different images, and printing can be included in almost all elements of the park. We offer UV PVC materials which glow under black light during disco nights. Another great feature is LED lighting which can be integrated in ninja courses under trampoline safety pads and other areas.

## GAMES AND TECHNOLOGY

Engaging the user to interact with other jumpers, or simply challenge him- or herself by use of technology, is becoming an integral part of trampoline parks. To boost user experience, we equip different park activities with games such as ninja warrior timer, augmented climbing wall, interactive wall-jumping and dodgeball attack.

### NINJA ELEMENTS

We supply an unlimited number of versatile elements for the ninja course and develop new ones every day. Our modular approach allows for quick and simple exchange of different obstacles, creating new experiences for the returning user.

## FURNITURE

Our service doesn't stop with delivery of the trampoline park. We supply our customers with furnishings such as reception desks, lockers, shipping containers converted into office space, walking platforms, padded benches, bean bags, you name it.
