

KROBAT
PASSION FOR JUMPING

**WORLD OF
TRAMPOLINES**

AKROBAT

With over sixteen years of experience in trampoline manufacturing we pride ourselves today as one of the top European suppliers of trampolines, focused on qualities that bring real value to our customers.

WE KEEP KIDS HEALTHY AND SAFE

We believe active play enriches children's lives and allows them to build a healthy body that will contribute to their overall development and help them achieve their full potential in adult life.

CERTIFIED PRODUCTS

All our products are made in accordance to highest EU standards.

WIDE RANGE OF TRAMPOLINES

We worship diversity, that's why our complete range of trampolines comes in all shapes and sizes and covers a wide spectrum of needs for different customer profiles.

100% MADE IN EUROPE

We like to keep the trampoline production close to home, to guarantee consistent quality of our products and to offer you unsurpassed customer service.

62.7 % SOFTER BOUNCE ABSORPTION

Akrobat trampolines have been laboratory tested for their ability to absorb jumps and the intensity of the G-force they subject the body to. Results demonstrated a more even deceleration of the jump, slowly bringing the body to a halt and softly absorbing the landing, compared to mainstream competitor products. This guarantees Akrobat trampolines are a better choice when it comes to children's joints and spine.

EXPERT ENGINEERING AND CRAFTSMANSHIP

All Akrobat trampolines are designed to exceed customer's expectations. They are safer to use, endure extremely heavy loads, resist changing weather conditions and provide superior bounce performance.

PRODUCTS

Akrobat trampolines are synonymous for lasting quality, unpaired performance and guaranteed safety. And they're so much fun!

MADE TO LAST!

We use strictly tested, certified and non-toxic weather-resistant materials that ensure years of operation. Our heavy-duty frames are made of hot-galvanized steel with minimum 275 g/m² zink coating guaranteeing reliable mechanical strength and resistance to rust even in coastal areas with high concentration of salt mist.

GUARANTEED TO WITHSTAND 2.5 MILLION JUMPS

Because we use the best quality, certified materials and don't take any shortcuts, we can support our dedication to quality by offering industry-leading warranties. All Akrobat trampolines are 100% Made in Europe, built to outlive their competitors and offer long-term companionship.

AKROSPRING PRO SYSTEM

The innovative spring system is extremely durable and offers long-lasting elasticity, quiet operation and a more powerful bounce experience with low impact on the body.

AKROCLICK SYSTEM

Akrobat trampolines are extremely easy to assemble due to the smart click system that allows the profiles to connect without use of screws or tools. AkroClick gets the job done in a few short and easy steps.

CAMPING

HOTELS & RESORTS

Designed for entertainment on beaches, camping sites, shopping malls and sports parks, these powerful and modular public use trampolines can be mixed and matched to achieve different surface area sizes with multiple jumping fields, and accommodate various number of jumpers. The sturdy support structure offers stability on different types of surfaces, while the heavy-duty padding, additional spring protection and full safety net enclosure guarantee maximum jumper safety. The custom-made design allows a choice of different colours of safety pads to suit individual preferences.

MEDY

KINDERGARTEN & SCHOOLS

MEDICAL & SPECIAL NEEDS

The Akrobat Medy was designed for indoor use in homes, kindergartens and rehabilitation centres. This all-round indoor trampoline is the number one choice for physiotherapy, child exercise and quality family time.

Height-adjustable trampoline for school gymnastics allows three different incline angles suited for different jumper's skill levels and to assist at different types of jumps. Foldable telescopic legs ensure strong grip and stability on all surfaces and allow easy storage.

ACCESSORIES

We have rounded up a selection of accessories that either prolong the life span of the trampoline by offering protection, or extend the ways it can be used.

1 WEATHER COVER

Providing year-round maximum protection from damage caused by weather and debris, the cover will increase the life span of the trampoline and add countless jumping moments. Made of UV-resistant high-quality PVC and available for all sizes and shapes of trampolines.

2 LADDER

We supply two different types of ladders for use with above ground trampolines, depending on customer preferences regarding size and number of steps.

3 SHOE MAT

The shoe mat allows the child to stand comfortably, even when barefoot, as it prepares to climb the ladder onto the trampoline. It keeps dirt away and helps the trampoline stay nice and tidy.

4 TRAMPOLINE SOCKS

Durable trampoline socks with high quality grips ensure a higher level of safety. The traction material used on the soles of the socks provides friction that reduces sliding and can decrease the likelihood of accidents. In case of numerous users, the socks also help control the spreading of microbes which can be exchanged between bare feet.

5 WEED PROTECTION

When installing an in-ground trampoline, it is advised to cover the hole with a weed membrane, which will stop the weeds from growing underneath your trampoline. This way, you can prevent weeds to grow through the springs and obstruct the jumping experience.

6 SPRINGS

The innovative springs are extremely durable and offer long-lasting elasticity, quiet operation and a more powerful bounce experience with low impact on the body.
